

# Cypress Bank

State Savings Bank

## EMV Debit Cards

Cypress Bank takes fraud prevention very seriously. Your Cypress Bank chip enabled debit card provides you with a much safer way to initiate card based transactions. In the wake of large-scale data breaches and increasing rates of counterfeit card fraud, the migration to this technology provides you a much greater level of personal protection. While your new card also permits you to continue to swipe it to complete your transactions, we urge you to utilize the chip feature where accepted. We are issuing all new debit card numbers. If you have auto draft transactions tied to your debit card account number, you will need to update that information with the merchant.
